

Hydro Test Truck

Series: HTT

Rev 1

The **Hydesso** Hydrostatic Test Truck (HTT) is a robust and reliable unit capable of producing a max pressure of 15,000 PSI and flow of 10.3 GPM. Standard onboard water storage is over 600 gallons. A high pressure, PRV is included to protect the equipment from over pressurization. A high speed winch is mounted on the front bumper to facilitate downhole operations. All controls, along with an extra air nozzle, are located inside the control cabin of the truck. The large Ø6", 0-16,000 PSI pressure gauge is well-positioned for optimal visibility from the driver's seat. This truck also includes a hand cranked hose reel with 50' of Ø9/16" high pressure 15K hose. Located at the truck rear is a 10' sliding rack which is useful for long tools or pipe joints. Extra tool boxes, rear bumper storage, and a pipe vise are standard features. Water cooler and ice chest storage provisions are made to ensure your team is ready to go. Extra features and options are available.

PHYSICAL CHARACTERISTICS¹

Bed Length	13'6"
Bed Width	98"
Truck GVWR	25,999 lb

¹ Custom size available

TANK SIZES¹

Water Tank	620 Gallon
Hydraulic Tank	130 Gallon

¹ Custom size available

TRIPLEX PUMP²

Max Pressure	15,000 psi
Max Flow	10.3 GPM
Plunger Sizes	¾"

² Additional pump pressure and flow options available.
