

Equipment Maintenance and Service Capabilities

rev 1

Hydessco's equipment maintenance and service capabilities are core functions of our business. Far beyond initial sales and equipment fabrication, we are ready to assist with any maintenance or service needs – regardless of the manufacturer. We have a broad skillset and look forward to new opportunities.

Hydessco's highly experienced welders, hydraulic technicians, diesel technicians, sales team, and engineering staff are ready to keep your equipment operating properly and generating revenue for your business.

We can take care of your hydraulic cylinder repairs as well as pumps and motors. We can perform diesel engine diagnostics on medium and heavy duty vehicles, regeneration (regen), clutch adjustments, valve lash adjustments, replace brakes, air ride suspension, PTO's, any hydraulic equipment, and various other vehicle related services. We can also test, diagnose, flush, and charge your air conditioning system.

If you need maintenance or repair on your agricultural equipment – we have you covered. We've serviced tractors, back hoes, hay spreaders, fork lifts, and farming implements, among other agriculture equipment.

We are well known for our capillary and banding equipment and can provide maintenance or replacement service for spoolers, injector heads, HPU's, cranes, control system, etc.

Additionally, **Hydessco** can repair or service equipment on treater trucks, chemical delivery trucks, hydro test trucks, bucket trucks, dump trucks, triplex pumps, and various other types of hydraulically power equipment.
